**Data Notes** 

#### **Agricultural Overview**

This bulletin covers 27 agricultural industries in the State of California. The number of industries ranges from five to seventeen within each of the six geographic regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details).

The data are organized into the following tables by state and region:

- Wage and Salary Workers
- Average Hourly Earnings

1

#### Introduction

The California Agricultural Bulletin is produced by the Employment Development Department (EDD) in cooperation with the U.S. Department of Agriculture and through a grant from the U.S. Department of Labor. Because of changes in sampling and estimating procedures, farm employment data published by EDD prior to January 1997 may not be strictly comparable to current estimates.

#### **Summary**

#### **Employment**

California agricultural employment for July 2000 increased by 20,600 jobs over the previous month, a gain of five percent. Total Agricultural Production, from June 2000 to July 2000, registered an increase of 16,900 jobs, a gain of seven percent. Agricultural Services registered an increase of 3,700 jobs, for a gain of two percent. Agricultural employment normally shows a decrease from June to July. The change in California agricultural employment from June 1999 to July 1999 was a decrease of 11,400 jobs.

A contributing factor to the increased employment for July was the rain and hailstorms during the month of June that delayed fieldwork in the San Joaquin and Sacramento Valley Regions. Field activities were progressing normally, however, in July. Vegetables and Melons registered the largest change in the number of jobs with an increase of 10,100 for the month of July 2000. Other Fruits and Nuts registered a significant increase with a gain of 8,500 jobs. The largest decrease for July 2000 was registered in Grapes with a decline of 9,600 workers. Total agricultural employment increased in the Central Coast, North Coast, San Joaquin Valley, and Sacramento Valley regions while decreases were registered in the Desert and South Coast regions.

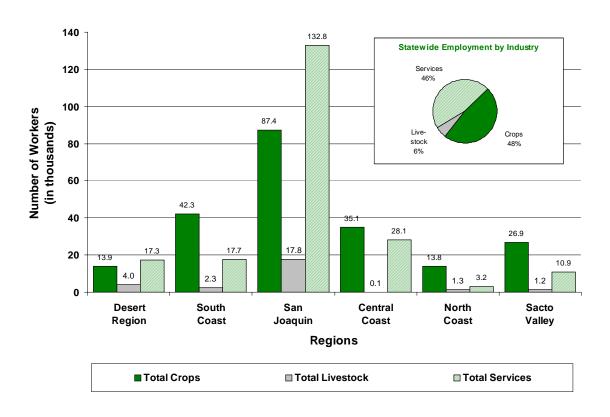

#### **Production and Crop Activity**

Farm workers were busy cultivating and weeding. Small grains were combined and hay was cut and baled. Sugar beets, honeydew and crenshaw melons were harvested. Tomatoes, bell peppers, and corn were planted. Some bean fields were still being planted. Many fields were disced or burned in preparation for planting other crops. Pollination continued in alfalfa fields. Cotton, corn, and alfalfa fields were treated for insects. Rice and bean fields were treated for worms. Sacramento Valley farmers applied aphid treatments to asparagus and melon fields. Most dry land grain plantings were harvested and wheat seed harvesting continued. Vegetables harvested during the month included basil, green beans, bok choy, broccoli, carrots, cilantro, cucumbers, eggplant, garlic, mustard and collard greens, kabocha, lemon grass, mint, mixed melons, okra, onions, parsley, peppers, radishes, snap peas, spinach, sweet corn, tomatoes, and zucchini.

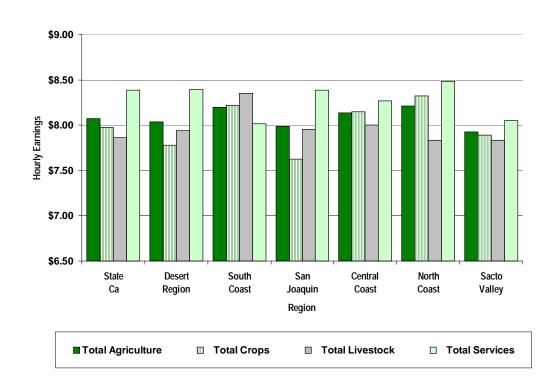

Growers were actively conducting cultural activities in vineyards and orchards. Activities included weed control, fungicide applications, and irrigation. Grape vineyards were treated for mildew and leafhoppers. The harvesting of table grapes was active in the Coachella and San Joaquin Valleys. Bartlett pears were harvested in the Sacramento delta area. Harvesting of apricots, figs, nectarines, plums, and peaches was active. The picking of gala variety apples continued. Strawberry picking was active on the central coast. Valencia oranges and lemons were harvested in Southern California and grapefruit was picked in the San Joaquin Valley.

#### **DATA NOTES**

#### **Data Sources:**

These data are obtained from two sources: the Employment Development Department (EDD) Covered Employment and Wages (ES-202) data files and a monthly survey conducted by the California Agricultural Statistical Service (CASS) of the U.S. Department of Agriculture (USDA) and the Labor Market Information Division of EDD of 4,200 agricultural employers. The sample was selected to be representative of the state's agricultural employers by size, geographic location, and industry categories. Sample data are gathered for the survey week that includes the 12<sup>th</sup> calendar day of the month. All data in this bulletin represent activities taking place during this mid-month period. Same month prior year employment data are benchmarked to the ES-202 data files maintained by EDD.

#### **Data Comments:**

To aid in accurate usage and interpretation of the data, please note the following:

- Agricultural Services employment survey data may be recalculated; historical trend information is used to adjust sample data when low response rates occur.
- Regional data may show greater variability than statewide data because of small sample size and variable reporting patterns in specific industries.
- Current month regional estimates are based on the recorded addresses of owner-operators. Same month prior year regional data are based on worksite locations. Significant differences between regional current month and same month prior year data could result, although statewide totals might be comparable.
- Where data cannot be estimated because of inadequate sample reporting, the letters "na" have been entered into the
  field to indicate estimates are not available.
- Wage data include wages of supervisors and hired non-production workers (primarily administrative personnel). Piece rate data are also included where applicable.
- Fishing, forestry, and hunting industry data are not included in the Agricultural Services estimates. Unique seasonal industry patterns of employment make producing employment estimates for these industries problematic.
- Employment data do not include employers of unpaid family workers.
- Agricultural workers who are employed by farm labor contractors are reported in Agricultural Services under that
  industry category. Employment levels in Crop Production and Livestock Production do not reflect their activities in the
  associated industries that contract with the farm labor contractors.

Total agricultural employment and hourly earnings estimates in this bulletin are derived from the monthly Current Employment Statistics for Agriculture project. Estimates in this bulletin will differ from other agricultural estimates published by EDD and the USDA because of differences in the number of industries covered and in the definition of agricultural workers.

#### **Subscriptions:**

Annual subscriptions are available for \$30.00 per year. Ask for publication number LAU-15. To subscribe or for information, please call (916) 262-2162 or write to:

Employment Development Department Labor Market Information Division Publications Information Unit 7000 Franklin Blvd., Building 1100 Sacramento, CA 95823
